On May 9, the City Federation of Industry and Commerce held a China-U.S. magnesium industry chain business negotiation meeting. The meeting was presided over by Zhang Xiuqian, chairman of the Municipal Federation of Industry and Commerce.

Zhou Xiaofang, president of Galaxy China Magnesium (Yulin) Science, Industry and Trade Co. Ltd., introduced the development of Galaxy China Magnesium in terms of capital, technical support, transformation and upgrading of the magnesium industry, overseas warehouse layout and overseas market development.

She said that Galaxy China Magnesium Co., Ltd. came to Yulin to find high-end R&D enterprises in the entire magnesium industry chain and to link with cooperative enterprises. At the same time, 100 million US dollars of international financial investment capital will be brought in, which will be invested in magnesium metal smelting, magnesium alloy processing, and industrial research and development.

The person in charge of the Municipal Bureau of Industry and Information Technology introduced the development status and development ideas of the city's magnesium industry.

The municipal party committee and government will make overall rational plans, seize the opportunity of environmental protection inspection and rectification, optimize resource allocation, and maintain Yulin's existing market position in magnesium; will cultivate leading enterprises, extend the industrial chain, build platforms, introduce and cultivate high-end technical forces; strengthen policy support, issue a series of supporting documents from technological innovation, talent introduction, etc., and vigorously develop the magnesium industry.

At the meeting, magnesium industry enterprises exchanged ideas on the sales of magnesium ingots and magnesium alloys, the establishment of overseas warehouses, new technologies for magnesium smelting, and the establishment of bulk trading markets. Zhou Xiaofang signed a contract with Ma Xiaolong, general manager of Shaanxi Hualing New Material Technology Co., Ltd.

Zhang Xiujian pointed out that it is necessary to seize the policy dividend and technological revolution opportunity of the magnesium industry being included in the regional brand, and continuously improve the gold content, new content and green content of the magnesium and magnesium alloy industry.

This fair is an opportunity to deploy an innovation chain around the industrial chain, lay out the industrial chain around the innovation chain, and strive to make breakthroughs in key core technologies such as green and efficient smelting in a short period of time, and promote the green and low-carbon development of the magnesium and magnesium alloy industry. It is hoped that the signing parties and participating enterprises can strengthen exchanges and cooperation, learn from each other, constantly overcome the difficulties and problems existing in the development of the current magnesium industry, deepen cooperation in the fields of production technology, product innovation, market expansion, and strive to promote the high-speed development of the magnesium industry. Quality development to achieve mutual benefit and win-win results.

Li Jianfen, secretary-general of the Municipal Federation of Industry and Commerce and member of the party group, and the heads of more than 30 enterprises related to the upstream and downstream of the Yulin magnesium industry from the Municipal Development and Reform Commission, the Municipal Bureau of Industry and Information Technology, the Municipal Bureau of Commerce, Yulin Customs, the Municipal Port Service Center, the Municipal Investment Service Center, and the upstream and downstream of the Yulin magnesium industry, all attended the meeting.
